MEDICAL PRODUCTS

For about 10 years Lyapko Medical and Production Corporation specializes on production of needle shaped applicators from different metals which are used for improvement and keeping of human health. Lyapko Corporation is well-known not just in the CIS countries but also behind their borders. Lyapko production is a result of unique combining of a longterm practice experience of nonconventional Eastern medicine and modern technologies. It is called to recover, preserve and strengthen health, to bring harmony and happiness into each home. Despite of prevalence and wide popularity of a treatment method, the company, as well as its products, is on a stage of the dynamical development. Permanent perfection of "know-how", studying of scientific achievements using the century traditions, allow us taking leading position in the field of the health improvement due to the latent reserves of organism using natural resources. There is a wide assortment of needle shaped applicators nowadays. Lyapko applicator acts on principle of needle reflexotherapy being a new step of its further development and an efficient facility assisting in treatment and prevention of many diseases. Lyapko Applicator is protected with patents, is certified and corresponds to the world standards. The author of the invention - Lyapko Nikolai Grigorievich - doctor of higher category, academician of Russian Manual Academy (Moscow).

Медико-производственная корпорация «Ляпко» около 10 лет специализируется на производстве игольчатых аппликаторов из различных металлов, предназначенных для укрепления и сохранения здоровья человека. В результате уникального объединения многолетнего опыта практики нетрадиционной медицины Востока и современных технологий родилась продукция МПК «Ляпко», призванная восстановить, сохранить и укрепить здоровье. Несмотря на распространённость и широкую известность метода лечения, компания, как и её продукция, находятся в стадии динамичного развития. Постоянное совершенствование технологий производства, изучение научных достижений с использованием вековых традиций, позволяют компании занимать лидирующие позиции в области оздоровления человека за счёт скрытых резервов организма.
